2015 ANNUAL MEETING INVITATION

You are cordially invited to attend the 78th Annual Meeting of the Meteoritical Society, which will take place July 27–31, 2015, in Berkeley, California, across the bay from San Francisco. The meeting will be held on the campus of the University of California, Berkeley, one of the preeminent universities in the world. Oral sessions will be held in state-of-the-art auditoria of Stanley and Sibley Halls, plenary sessions in Pimentel Hall, and poster sessions in the historic Hearst Memorial Mining Building. Scheduled events include an icebreaker during the registration on Sunday, a banquet on Wednesday, an awards ceremony, and a choice of several afternoon excursions to San Francisco, a baseball game, NASA Ames, and Lawrence Berkeley National Lab. The meeting will be concluded with a farewell party on Friday afternoon. A post-conference Stardust workshop is being organized.

We have reserved 90 rooms (150 beds) in the Foothill Suites and Stern Residence Hall, 15 rooms in the Faculty Club, and 15 rooms in the Women's Faculty Club. In addition, several local hotels are within walking distance of the meeting location. The campus is within walking distance of many coffee shops, bars, and restaurants, ranging from very affordable to Alice Water's world famous Chez Panisse. The typical weather in July has warm days, no rain, and cool evenings, so bring a sweater but leave the umbrella at home.

The Berkeley campus can be reached by public transport, Bay Area Rapid Transit (BART), and is within 30 minutes of Oakland International Airport and 50–60 minutes of San Francisco International Airport. San Francisco is, of course, a major tourist destination and is only a 20 minute ride away on BART. Day trips to Napa/Sonoma wine country, Muir Woods National Monument, Monterey, Santa Cruz, and Yosemite National Park can be arranged.

Additional details can be found on the meeting website, <http://metsoc2015.ssl.berkeley.edu>.

For more information please contact the Organizing Committee chair, Kunihiro Nishizumi, at kuni@ssl.berkeley.edu.

STUDENT TRAVEL AWARDS

This year, 63 students who attended the annual meeting of the Society in Casablanca, Morocco, received travel grants. Student travel grants and travel grants for scientists from countries with limited financial resources are generously sponsored by the Barringer Crater Company, the Planetary Studies Foundation, NASA (Cosmochemistry Program), The Meteoritical Society Endowment Fund, the International Mineral Collectors Association (Brian Mason Award), the Académie Hassan II des Sciences et Techniques ACASITEC Morocco, and Hassan II University Casablanca UH2C, Faculty of Sciences Ain Chock FSAC.

Meteoritical Society Endowment Fund

Amit Basu Sarbadhika, Physical Research Laboratory, Ahmedabad, India
 Mouley Charaf Chabou, Ferhat Abbas University, Setif 1, Algeria
 Mitali Damle, AGCA, India
 Abbasheer Gismelsee, Sultan Qaboos University, Muscat, Oman
 Mohamed Tharwat Heikal, Tanta University, Egypt
 Maria Khirfan, University of Amman, Jordan
 Ratiba Sahoui, USTHB, UMMTO, Algiers, Algeria
 Edith Millarca Valenzuela Picon, Universidad Catolica de Chile
 Maria Eugenia Varela, ICATE, CONICET, Argentina

Barringer Crater Company Fund

Natasha Vasiliki Almeida, Natural History Museum, London, UK
 Thomas Barrett, The Open University, UK
 Luke Daly, Curtin University, Perth, Australia
 Grace De Olivera, Campinas State University, São Paulo, Brazil
 Edivaldo Dos Santos, Centro Brasileiro de Pesquisas Físicas, Rio De Janeiro, Brazil
 Matthias Ebert, Museum of Natural History–Berlin, Germany
 Razilya Gizzatullina, Ural Federal University, Russian Federation
 Christopher Hamann, Museum für Naturkunde Berlin, Germany
 Hiraki Hazegawa, University of Tokyo, Japan
 Desiree Hoehnel, University of Vienna, Austria
 Aurore Hutzler, CEREGE, Université Aix-Marseille, France
 Noriyuki Kawasaki, Hokkaido University, Japan
 Agata Krzesinska, Polish Academy of Sciences, Poland
 Andrew Langendam, Monash University, Australia
 Adrienne Macartney, University of Glasgow, UK
 Alevtina Maksimova, Ural Federal University, Russian Federation
 Dayl Martin, University of Manchester, UK
 Nassima Meftah, Université d'El-Oued, Algeria
 Mészáros Marianna, University of Bern, Switzerland
 Seda Ozdemir, University of Vienna, Austria
 Annemarie Pickersgill, University of Western Ontario, Canada / University of Glasgow, UK
 Emily Pringle, Institut de Physique du Globe de Paris, France
 My Riebe, ETH Zürich, Switzerland
 Jay Shah, Imperial College London, UK
 Alaura Singleton, University of Western Ontario, Canada
 Elisabeth Steer, The Open University, UK
 Epifanio Vaccaro, The Natural History Museum, London, UK
 Asli Yener, Museum für Naturkunde Berlin, Germany
 William Zylberman, CEREGE, Université Aix-Marseille, France

NASA Cosmochemistry Program

John Bigolski, CUNY Graduate Center/AMNH
 Carolyn Crow, UCLA, USA
 Ingrid Daubar, University of Arizona, USA
 Pierre Haenecour, Washington University in St. Louis, USA
 Romy Hanna, University of Texas at Austin, USA
 Christine Jilly, University of Hawaii at Manoa, USA
 Chizu Kato, Washington University in St. Louis, USA
 Levke Koop, University of Chicago, USA
 Jonathan Lewis, University of New Mexico, USA
 Nicole Lunning, University of Tennessee, Knoxville, USA
 Prajka Mane, Arizona State University, USA
 Christopher Snead, University of California, Los Angeles, USA
 Myriam Telus, University of Hawaii at Manoa, USA
 Kera Tucker, Arizona State University, USA
 Maria Valdes, Washington University in St. Louis, USA
 Michael Zanetti, Washington University in St. Louis, USA

GABEC-GNM INTERNATIONAL SCHOOL: INNOVATIVE METHODOLOGIES FOR THE CHARACTERISATION, DIAGNOSIS AND CONSERVATION OF CULTURAL HERITAGE

GABeC (Georisorse, Ambiente, Beni Culturali) and GNM (Gruppo Nazionale di Mineralogia), two informal groups that operate under the aegis of SIMP, held an International School on the theme “Innovative Methodologies for the Characterisation, Diagnosis and Conservation

of Cultural Heritage, in Catania and Siracusa (Sicily) on July 1–4, 2014. The School emphasized a multidisciplinary approach, presenting the viewpoints of geologists, physicists, chemists and archaeologists, and featured lectures delivered by eleven distinguished experts. The 53 participants were also given the opportunity to present posters about their current research. The School was complemented by visits to the Archaeological Park and the Paolo Orsi Museum in Siracusa. Germana Barone and Paolo Mazzoleni, local contacts of the Organizing committee, did their best to make everything run smoothly and happily. For more details, visit <https://sites.google.com/site/school-gabec2014/>, where you can download the abstracts of presentations. Selected contributions from the School will be published in a special issue of the *European Journal of Mineralogy*.

International Meteorite Collectors Association – Brian Mason Award

Agnese Fazio, University of Pisa, Italy

Planetary Studies Foundation

Ellen Crapster-Pregont, Columbia University–AMNH, USA
Sarah Simpson, University of Glasgow, UK

Académie Hassan II des Sciences et Techniques ACASITEC, Morocco

Souad Chaabout, UH2C, FSAC, GAIA Laboratory, Morocco
Nawel Larouci, UH2C, FSAC, GAIA Laboratory, Morocco

Hassan II University Casablanca UH2C, Faculty of Sciences Ain Chock FSAC

Houda El Kerni, UH2C, FSAC, GAIA Laboratory, Morocco
Maria Aboulahris, UH2C, FSAC, GAIA Laboratory, Morocco
Youssef Idomar, UH2C, FSAC, GAIA Laboratory, Morocco
Paul Mongui, UH2C, FSAC, GAIA Laboratory, Morocco

INTERNATIONAL COLLECTORS ASSOCIATION – BRIAN MASON AWARD

In 1997, Joel Schiff, the first editor of the popular *Meteorite* magazine, created a travel award in honor of Brian Mason, who was born in New Zealand. The award is given to a student attending the annual meeting of the Society who submits an abstract that presents clearly explained, exciting results of particular interest to readers of *Meteorite* magazine. The recipient is required to write a popular account of his/her work for the magazine. Since 2008, the award has been generously funded by the International Meteorite Collectors Association.

Agnese Fazio

This year the program committee for the Casablanca meeting selected Agnese Fazio to win the Brian Mason Award. Agnese is a graduate student at the University of Pisa, Pisa, Italy. She submitted an abstract entitled “Shock metamorphism and impact melting in small impact craters on Earth: Evidence from Kamil Crater, Egypt,” authored by A. Fazio, L. Folco, M. D’Orazio, M. Frezzotti, and C. Cordier. This paper discusses the small, relatively recent Kamil Crater and the shock features found in the rocks surrounding the impact structure.

CALL FOR AWARD NOMINATIONS

Please consider nominating a colleague for one of the Society’s awards. Nominations should be sent to Secretary Mike Weisberg (metsec@gmail.com) by January 15 (January 31 for the Service Award and the Pellas–Ryder Award). For more information and details on how to submit a nomination for any of these awards, please see the latest Newsletter on the Society website or e-mail the secretary.

The Society gives a number of awards each year. The **Leonard Medal** honors outstanding contributions to the science of meteoritics and closely allied fields. The **Barringer Medal and Award** recognize outstanding work in the field of impact cratering and/or work leading to a better understanding of impact phenomena. The **Nier Prize** recognizes outstanding research in meteoritics and closely allied fields by young scientists (under 35). The **Service Award** honors members who have advanced the goals of the Meteoritical Society to promote research and education in meteoritics and planetary science in ways other than by conducting scientific research. The **Paul Pellas–Graham Ryder Award** is given for the best student paper in planetary science and is awarded jointly by the Meteoritical Society and the Planetary Geology Division of the Geological Society of America.
