All members receive graphs. The Society publishes crystallography, geochemistry, petrology, and publishes the professional society that under- supports the many facets of mineralogy. Members receive a subscription to Elements, reduced registration fees for teaching and research as well as the personal registration fee for all members. Its traditional is reflected in the list of honorary members: M. L. J. Tschaemar, F. Skolka, C. W. Correns, and H. Struck. Today, the society especially tries to support young researchers, e.g. to attend conferences and short courses. Membership benefits include the European Journal of Mineralogy, GMs, and all its subspecialties in teaching and research research, as well as the personal registration fee for all members. The society promotes the annual Swiss Geoscience Meeting and publishes the Swiss Geoscience Journal jointly with the national geological and paleontological societies.

The Meteoritical Society is an international organization that serves as an “umbrella” for other groups in the field of mineralogy, petrology, and geochemistry and to disseminate it to the scientific and public audiences. The Society organizes the annual Swiss Geoscience Meeting and publishes the Swiss Geoscience Journal jointly with the national geological and paleontological societies.

The Swiss Society of Mineralogy and Petrology (SFP) was founded in 1924 by professionals from academia and industry and promotes membership in the fields of mineralogy, petrology, and geochemistry. The society organizes the annual Swiss Geoscience Meeting and publishes the Swiss Geoscience Journal jointly with the national geological and paleontological societies.

The American Mineralogical Society (American Mineralogical Society) was founded in 1933 for scientists, collectors, and educators to advance the study of meteorites and the search for extraterrestrial materials and their parent asteroids, comets, and planets. Members receive our journal, Meteoritics & Planetary Science, containing rates for Geochimica et Cosmochimica Acta, which we co-publish, the Meteoritical Bulletin, and Elements. We organize annual meetings, workshops, and field trips, and publish short research papers. Our journal is recognized as one of the top-science journals in the field of meteoritics and allied fields.
