

Elements

An International Magazine of Mineralogy, Geochemistry, and Petrology

Volume 7, Number 1 • February 2011

ABOUT THE COVER:

The image shows the extensive dust tail and narrow ion tail of Comet McNaught; it is the sum of three 30-second exposures taken at twilight on 20 January 2007. The photographer used a Nikon D200 and an 85 mm lens at f/1.6, ISO 100. The image looks over Warrumbungle National Park, New South Wales, Australia. Elements is published jointly by the Mineralogical Society of America, the Mineralogical Society of Great Britain and Ireland, the Mineralogical Association of Canada, the Geochemical Society, The Clay Minerals Society, the European Association of Geochemistry, the International Association of GeoChemistry, the Soci t  Francaise de Min ralogie et de Cristallographie, the Association of Applied Geochemists, the Deutsche Mineralogische Gesellschaft, the Soci t  Italiana di Mineralogia e Petrologia, the International Association of Geoanalysts, the Polskie Towarzystwo Mineralogiczne (Mineralogical Society of Poland), the Sociedad Espa ola de Mineralog a, the Swiss Society of Mineralogy and Petrology, and the Meteoritical Society. It is provided as a benefit to members of these societies.

Elements is published six times a year. Individuals are encouraged to join any one of the participating societies to receive *Elements*. Institutional subscribers to any of the following journals—*American Mineralogist*, *Clay Minerals*, *Clays and Clay Minerals*, *Mineralogical Magazine*, and *The Canadian Mineralogist*—also receive one copy of *Elements* as part of their 2011 subscription. Institutional subscriptions are available for US\$160 (US\$175 non-US addresses) a year in 2011. Contact the managing editor (tremblpi@ete.inrs.ca) for information.
