Elements is published jointly by the Mineralogical Society of America, the Mineralogical Society of Great Britain and Ireland, the Mineralogical Association of Canada, the Geochemical Society, The Clay Minerals Society, the European Association of Geochemists, the International Association of GeoChemistry, the Société Française de Minéralogie et de Cristallographie, the Association of Applied Geochemists, the Deutsche Mineralogische Gesellschaft, the Società Italiana di Mineralogia e Petrologia, the International Association of Geoanalysts, the Polskie Towarzystwo Mineralogiczne (Mineralogical Society of Poland), the Sociedad Española de Mineralogía, the Swiss Society of Mineralogy and Petrology, and the Meteoritical Society. It is provided as a benefit to members of these societies.

Elements is published six times a year. Individuals are encouraged to join any one of the participating societies to receive Elements. Institutional subscribers to any of the following journals—American Mineralogist, Clay Minerals, Clays and Clay Minerals, Mineralogical Magazine, and The Canadian Mineralogist—also receive one copy of Elements as part of their subscription. Institutional subscriptions are available for US$160 (US$175 non-US addresses) a year in 2011. Contact the managing editor (tremblpi@uwaterloo.ca) for information.

**About the Cover:**

The image shows the extensive dust tail and narrow ion tail of Comet McNaught; it is the sum of three 30-second exposures taken at twilight on 29 January 2007. The photographer used a Nikon D200 and an 85 mm lens at f/1.6, ISO 100. The image looks over Warrumbungle National Park, New South Wales, Australia.
