

# Elements

An International Magazine of Mineralogy, Geochemistry, and Petrology

Volume 7, Number 5 • October 2011

*Elements* is published jointly by the Mineralogical Society of America, the Mineralogical Society of Great Britain and Ireland, the Mineralogical Association of Canada, the Geochemical Society, The Clay Minerals Society, the European Association of Geochemistry, the International Association of GeoChemistry, the Société Française de Minéralogie et de Cristallographie, the Association of Applied Geochemists, the Deutsche Mineralogische Gesellschaft, the Società Italiana di Mineralogia e Petrologia, the International Association of Geoanalysts, the Polskie Towarzystwo Mineralogiczne (Mineralogical Society of Poland), the Sociedad Española de Mineralogia, the Swiss Society of Mineralogy and Petrology, and the Meteoritical Society. It is provided as a benefit to members of these societies.

*Elements* is published six times a year. Individuals are encouraged to join any one of the participating societies to receive *Elements*. Institutional subscribers to any of the following journals—*American Mineralogist*, *Clay Minerals*, *Clays and Clay Minerals*, *Mineralogical Magazine*, and *The Canadian Mineralogist*—also receive one copy of *Elements* as part of their 2011 subscription. Institutional subscriptions are available for US\$160 (US\$175 non-US addresses) a year in 2012. Contact the managing editor (tremblpi@ete.inrs.ca) for information.

## Tourmaline

Guest Editors: **Barbara L. Dutrow and Darrell J. Henry**

### Tourmaline: A Geologic DVD

Barbara L. Dutrow and Darrell J. Henry

### Tourmaline the Indicator Mineral: From Atomic Arrangement to Viking Navigation

Frank C. Hawthorne and Dona M. Dirlam

### Tourmaline Isotopes: No Element Left Behind

Horst R. Marschall and Shao-Yong Jiang

### Tourmaline as a Recorder of Ore-Forming Processes

John F. Slack and Robert B. Trumbull

### Tourmaline as a Petrologic Forensic Mineral: A Unique Recorder of Its Geologic Past

Vincent J. van Hinsberg, Darrell J. Henry, and Barbara L. Dutrow

### Tourmaline: The Kaleidoscopic Gemstone

Federico Pezzotta and Brendan M. Laurs

**ABOUT THE COVER:**  
These elongate tourmaline crystals, probably an elbaite species, display a common color change toward the top of the crystal. Tourmaline is associated with plates of albite (white) and a crystal of fluorite (green). The specimen is from Stak Nala, Pakistan, and is 10.6 cm high. However, tourmaline is more than just another pretty mineral—it can be a single-mineral thermometer, a provenance indicator, and a recorder of *P-T-X* conditions.
