OneGeochemistry

Global Alliance for FAIR Geochemical Data

OneGeochemistry is an international initiative aiming to establish global standards and best practices for Open and FAIR geochemical laboratory analytical data.

Endorsed by six geo- and cosmochemical societies to drive global consensus on data publication and reuse:

Alliance of data systems: 7 initiatives from 3 continents working together for better interoperability of global geochemical data services.

Promoting discovery and reuse: Compilation of existing standards and best practices relevant to geochemical data.

Community platform: Open working groups for developing digital best practices for specific methods or data types.
