

Elements

An International Magazine of Mineralogy, Geochemistry, and Petrology

Volume 16, Number 3 • June 2020

Elements is published jointly by the Mineralogical Society of America, the Mineralogical Society of Great Britain and Ireland, the Mineralogical Association of Canada, the Geochemical Society, The Clay Minerals Society, the European Association of Geochemistry, the International Association of Geochemistry, the Société Française de Minéralogie et de Cristallographie, the Association of Applied Geochemists, the Deutsche Mineralogische Gesellschaft, the Società Italiana di Mineralogia e Petrologia, the International Association of Geoanalysts, the Polskie Towarzystwo Mineralogiczne (Mineralogical Society of Poland), the Sociedad Española de Mineralogía, the Swiss Society of Mineralogy and Petrology, the Meteoritical Society, the Japan Association of Mineralogical Sciences, and the International Association on the Genesis of Ore Deposits. It is provided as a benefit to members of these societies.

Elements is published six times a year. Individuals are encouraged to join any one of the participating societies to receive *Elements*. Institutional subscribers to any of the following journals—*American Mineralogist*, *Clay Minerals*, *Mineralogical Magazine*, and *The Canadian Mineralogist*—also receive one copy of *Elements* as part of their 2020 subscription. Institutional subscriptions are available for US\$180 (US\$195 non-US addresses) a year in 2020. Contact the executive editor (jrosso.elements@gmail.com) for information.

 **GeoScienceWorld**
Participating Publisher

The Redox Engine of Earth

Guest Editors: **Roberto Moretti**, **Maria Rita Cicconi**, and **Daniel R. Neuville**

157

Earth's Electrodes

Maria Rita Cicconi, Roberto Moretti, and Daniel R. Neuville

161

Redox Processes in Early Earth Accretion and in Terrestrial Bodies

Kevin Richter, Christopher D.K. Herd, and Asmaa Boujibar

167

The Redox Boundaries of Earth's Interior

Vincenzo Stagno and Yingwei Fei

173

Magmas are the Largest Repositories and Carriers of Earth's Redox Processes

Maria Rita Cicconi, Charles Le Losq, Roberto Moretti, and Daniel R. Neuville

179

Volcanic and Geothermal Redox Engines

Roberto Moretti and Andri Stefansson

185

Electron Transfer Drives Metal Cycling in the Critical Zone

Melanie Davranche, Alexandre Gélabert, and Marc F. Benedetti

191

Biogeochemical Controls on the Redox Evolution of Earth's Oceans and Atmosphere

Christopher T. Reinhard and Noah J. Planavsky
