

Elements

An International Magazine of Mineralogy, Geochemistry, and Petrology

Elements is published jointly by the Mineralogical Society of America, the Mineralogical Society of Great Britain and Ireland, the Mineralogical Association of Canada, the Geochemical Society, The Clay Minerals Society, the European Association for Geochemistry, the International Association of GeoChemistry, the Société Française de Minéralogie et de Cristallographie, the Association of Applied Geochimists, the Deutsche Mineralogische Gesellschaft, the Società Italiana di Mineralogia e Petrologia, the International Association of Geoanalysts, the Polskie Towarzystwo Mineralogiczne (Mineralogical Society of Poland), the Sociedad Española de Mineralogía, and the Swiss Society of Mineralogy and Petrology. It is provided as a benefit to members of these societies.

Elements is published six times a year. Individuals are encouraged to join any one of the participating societies to receive *Elements*. Institutional subscribers to any of the following journals—*American Mineralogist*, *Clay Minerals*, *Clays and Clay Minerals*, *Mineralogical Magazine*, and *The Canadian Mineralogist*—will also receive *Elements* as part of their 2009 subscription. Institutional subscriptions are available for US\$150 a year in 2009. Contact the managing editor (tremblpi@ete.inrs.ca) for information.

Volume 5, Number 4 • August 2009

ABOUT THE COVER:

A composite chemical and magnetic image, by Takeshi Kasama, showing a magnetotactic bacterium in the midst of cell division (mitosis). Red, green, and blue indicate the relative abundances of C, S, and Fe, respectively. Contour lines showing the magnetic flux generated by nanoparticles of greigite and magnetite within the cell were obtained using electron holography.

Mineral Magnetism: From Microbes to Meteorites

Guest Editors: Joshua M. Feinberg and Richard J. Harrison

Mineral Magnetism: Providing New Insights into Geoscience Processes

Richard J. Harrison and Joshua M. Feinberg

Geodynamo History Preserved in Single Silicate Crystals: Origins and Long-Term Mantle Control

John A. Tarduno

Magnetism of Extraterrestrial Materials

Pierre Rochette, Benjamin P. Weiss and Jérôme Gattacceca

Rain and Dust: Magnetic Records of Climate and Pollution

Barbara A. Maher

Magnetic Nanocrystals in Organisms

Mihály Pósfai and Rafal E. Dunin-Borkowski

Crustal Magnetism, Lamellar Magnetism and Rocks That Remember

Suzanne A. McEnroe, Karl Fabian, Peter Robinson, Carmen Gaina, and Laurie L. Brown
