

Elements

An International Magazine of Mineralogy, Geochemistry, and Petrology

Elements is published jointly by the Mineralogical Society of America, Mineralogical Society of the UK and Ireland, Mineralogical Association of Canada, Geochemical Society, The Clay Minerals Society, European Association of Geochemistry, International Association of Geochemistry, Société Française de Minéralogie et de Cristallographie, Association of Applied Geochemists, Deutsche Mineralogische Gesellschaft, Società Italiana di Mineralogia e Petrologia, International Association of Geoanalysts, Polskie Towarzystwo Mineralogiczne (Mineralogical Society of Poland), Sociedad Española de Mineralogía, Swiss Geological Society, Meteoritical Society, Japan Association of Mineralogical Sciences, and International Association on the Genesis of Ore Deposits. The magazine is provided as a benefit to members of these societies.

Elements is published six times a year. Individuals are encouraged to join any one of the participating societies to receive *Elements*. Institutional subscribers to either of the following journals—*American Mineralogist* and *The Canadian Mineralogist*—also receive one copy of *Elements* as part of their subscription. Institutional subscriptions are available for US\$185 (US\$200 non-US addresses) per year in 2023. Contact the Executive Editor (editor@elementsmagazine.org) for information.

Large Igneous Provinces: Versatile Drivers of Global Change

Guest Editors: **Frances M. Deegan, Sara Callegaro, Henrik H. Svensen, and Joshua H.F.L. Davies**

Dykes from the North East Atlantic igneous province cutting through Cretaceous coal-bearing sandstone. Vaigat, west Greenland. PHOTO: HENRIK H. SVENSEN.

269

Driving Global Change One LIP at a Time

Frances M. Deegan, Sara Callegaro, Joshua H.F.L. Davies, and Henrik H. Svensen

276

How Large Igneous Provinces Have Killed Most Life on Earth—Numerous Times

Stephen E. Grasby and David P.G. Bond

282

Large Igneous Provinces and the Release of Thermogenic Volatiles from Sedimentary Basins

Henrik H. Svensen, Morgan T. Jones, and Tamsin A. Mather

289

Impacts of Large-scale Magmatism on Land Plant Ecosystems

Jennifer M. Galloway and Sofie Lindström

296

The Franklin Large Igneous Province and Snowball Earth Initiation

Francis A. Macdonald and Nicholas L. Swanson-Hysell

302

High-Precision Geochronology of LIP Intrusions: Records of Magma–Sediment Interaction

Sean P. Gaynor, Joshua H.F.L. Davies, and Urs Schaltegger
