2026 EAG AWARD NOMINATIONS: NOMINATE A DESERVING SCIENTIST!

Through various annual awards, fellowships, and special lectures, the EAG seeks to recognize the exceptional achievements and outstanding contributions of scientists to geochemistry and the community at different stages of their careers. Ensuring that the most deserving scientists are recognized requires the efforts of not only the volunteers serving on nomination and award committees, but the whole geochemistry community. A large and diverse pool of nominees is crucial and we encourage everyone in the community to consider nominating a colleague, mentor, student, or peer for a 2026 award!

Visit the EAG website at <https://www.eag.org/awards/> for full information on each award, the eligibility requirements, and how to assemble and submit a nomination!

H.C. Urey Award

Nomination deadline: 30 October

Recognizes scientists who have made outstanding contributions advancing geochemistry over a career. Important: a new nomination process has been established for the 2026 Urey Award. Find out more at <https://www.eag.org/awards/urey-award/nomination-urey/>.

Science Innovation Award

Nomination deadline: 30 October

Recognizes scientists who have recently made a particularly important and innovative breakthrough in geochemistry. Nominees must have received a recognized doctorate within 25 years of the first day of the year in which the award is given.

F.G. Houtermans Award

Nomination deadline: 30 October

Recognizes exceptional contributions to geochemistry by an early career scientist. Nominees must have received a recognized doctorate within 7 years of the first day of the year in which the award is given.

Geochemistry Fellowship

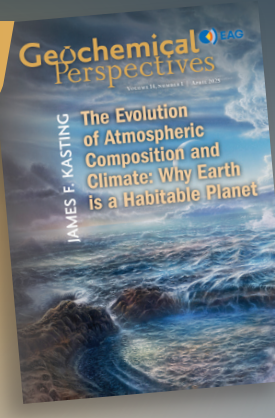

Nomination deadline: 30 October

Honors outstanding scientists who have made major contributions to the field of geochemistry. Bestowed jointly by the EAG and the Geochemical Society, the award is based on scientific excellence as well as the broader impacts candidates have made in their careers to date.

R. Berner Lecture

Nomination deadline: 6 December

Recognizes a mid-career scientist who has shown exceptional ability to define globally important biogeochemical processes, developed new understanding(s), and significantly advanced this area of research.
