

Elements

An International Magazine of Mineralogy, Geochemistry, and Petrology

Elements is published jointly by the Mineralogical Society of America, Mineralogical Society of the UK and Ireland, Mineralogical Association of Canada, Geochemical Society, The Clay Minerals Society, European Association of Geochemistry, International Association of GeoChemistry, Société Française de Minéralogie et de Cristallographie, Association of Applied Geochemists, Deutsche Mineralogische Gesellschaft, Società Italiana di Mineralogia e Petrologia, International Association of Geoanalysts, Polskie Towarzystwo Mineralogiczne (Mineralogical Society of Poland), Sociedad Española de Mineralogía, Swiss Geological Society, Meteoritical Society, Japan Association of Mineralogical Sciences, and International Association on the Genesis of Ore Deposits. The magazine is provided as a benefit to members of these societies.

Elements is published six times a year. Individuals are encouraged to join any one of the participating societies to receive *Elements*. Institutional subscribers to either of the following journals—*American Mineralogist* and *Canadian Journal of Mineralogy and Petrology*—also receive one copy of *Elements* as part of their subscription. Institutional subscriptions are available for US\$190 (US\$205 non-US addresses) per year in 2025. Contact the Executive Editor (editor@elementsmagazine.org) for information.

Earth's Carbon Cycle Thermostat: Beyond the Textbook Model

Guest Editors: **Laurence A. Coogan, Kimberly V. Lau,** and **Jeremy K.C. Rugenstein**

Examples of the major carbon sinks and sources to the Earth's surface discussed in this issue. The geological carbon cycle is modulated by ocean chemistry as well as biological and geological processes. PHOTOS: TIMOTHY BRALOWER, LAURENCE COOGAN, AND KIMBERLY LAU; SUPPLEMENTARY IMAGERY FROM ADOBE STOCK.

12

How Well Do We Understand the Geological Carbon Cycle?

Laurence A. Coogan, Kimberly V. Lau, and Jeremy K.C. Rugenstein

18

Igneous and Metamorphic CO₂ Sources: How Large and How Variable?

Emily M. Stewart and Kei Shimizu

24

Continental Weathering as Climate Stabilizer

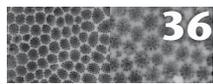

Gaojun Li and Gen K. Li

30

The Role of Seawater Interaction with the Ocean Floor in the Carbon Cycle

Wolfgang Bach and Alexander Diehl

36

The Fate of Ocean Alkalinity: Carbonate Formation and Reverse Weathering Reactions

Shaily Rahman and Elizabeth J. Trower

42

Burned or Buried: What Controls the Long-term Preservation of Organic Carbon?

Sandra Arndt and Dominik Hülse
