# OneGeochemistry

Expanding to Stable Isotope Systems

OneGeochemistry is happy to welcome a new data system member in [IsotopesAU](https://www.isotopesau.org), an Australian funded collaboration of four Australian Commonwealth science agencies, led by CSIRO. IsotopesAU brings together experts and stable isotope data from diverse applications including soils and rocks, groundwater, and agriculture and supply chains. Partnering with IsotopesAU provides an exciting opportunity to **share and standardise stable isotope data** through OneGeochemistry and increase the reach of these powerful tracers.

The OneGeochemistry team will be attending EGU and Goldschmidt 2026, including the session [Building Resilient and Sustainable Global Geochemical Infrastructures to Advance Earth Science Discovery](#) in Montreal. Please consider submitting an abstract to this important session on geochemical data and collaboration!
